
ARI Paginator and Rockettheme template

Posted by dtws2008 - 2013/01/08 06:59

Hello,
I am using rockettheme Maelstrom template. Can't get proper behavior of Paginator. Different Weird behavior for each paginator setting. Maybe conflicts with jquery? I am helpless, any idea?

Hello,

Where we can see the problem?

Regards,
ARI Soft

Hello,
Thanks for your prompt reply. Actually the problem occurred on my localhost. Now when tried it on the website for you to inspect, I see that so far it is ok. I will continue and hope that it will be smooth for now on. Thanks

Currently the extension can work only with Joomla! articles.

ok. Now i tried it with the following settings: Items per page=1 and Articles count=9. No navigation buttons appear. If the article count is less than 9, no problem. see the site:
<http://friskyvibe.com.au/eagle>
click the left most menu item, at the bottom you will see the pagination module. Article count is set now for 9.

Check that "Show next/prev navigation buttons" parameter is set to "Yes".

Yes it is. Again, no problem if the Article count is set for 8 or less. Let me know if you want me to change it to 8

Could you provide a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft
