
Vertical Scroll Bar

Posted by kokoruz - 2010/08/02 22:03

Is it possible to add a vertical scroll bar? I may have a situation with articles of different lengths and it would be nice if a scroll bar appeared for the longer pages.

Hello,

You can try to use the following CSS rule:

```
.aripag-main UL.aripag-holder
{
  overflow-y: auto;
}
```

Your idea wasn't quite what right but it was the catalyst that got me going. Instead of applying the overflow to the list wrapper (ul) I applied it to the list item (li) and it's perfect. Thanks for your help.

There is a bug in IE8 that occurs at the bottom of the page. It ignores the white space and only scrolls to the bottom edge of the text. I tested in FF and IE6 and IE7, Works perfect in those browsers.

If you figure out a work around for that please let me know.

Thanks Again
