Previous and Next Function

Posted by kokoruz - 2010/08/03 16:31

_____

Just a thought for a future release, add previous and next function that could be toggled on and off in the parameters menu.

_____

Hello,

Thanks for the idea. Do you have any thoughts or preferences where to display these controls and how it should look?

Regards,
ARI Soft

_____

I've attached a PSD with different button configurations as well as a JPG with the most common pagination layout.

_____

That's Awesone!

I modeled the look of the buttons after the ones used in the Carousel Module.

http://www.demo2.ari-soft.com/joomla-carousel-module.html

I can't wait to download the update.

Thanks Again,

K.

_____

Hello,

New version of the extension is available and it supports prev/next navigation. You can see it in action on our demo site.

Regards,
ARI Soft
