
Slider Hangs on 1st Slide

Posted by PaulBedford - 2011/04/06 08:57

Please see :-

www.whpfederation.org/1/

Slider works on other templates used but not this one. I'm hoping you will tell me the quick fix rather than spending hours on Google.

jQuery Plugin??

IE Gives the error

Message: Function expected

Line: 76

Char: 1

Code: 0

URI: http://www.whpfederation.org/1/index.php?option=com_content&view=frontpage&Itemid=50

But not working in Chrome either.

Total Joomla noob, please help...!

Sorry this post should also be in Easy Slider.

Setting Include JQuery to No I then get different errors :-

Message: 'jQuery' is undefined

Line: 13

Char: 1

Code: 0

URI: http://www.whpfederation.org/1/modules/mod_arieasyslider/includes/js/jquery.easing.js

Message: 'jQuery' is undefined

Line: 1

Char: 1

Code: 0

URI: http://www.whpfederation.org/1/modules/mod_arieasyslider/includes/js/jquery.easyslider.js

Message: 'jQuery' is undefined

Line: 64

Char: 1

Code: 0

URI: http://www.whpfederation.org/1/index.php?option=com_content&view=frontpage&Itemid=50

Hello,

This problem with extension which includes the next javascript code:

`InputsExclusion.push('.content_vote','#rt-popup')`

it should be:

`InputsExclusion.push('.content_vote','#rt-popup');`

If you have any difficulties with fixing this code, you can provide temporary access to your Joomla! backend by email and we will be glad to help.

Regards,
ARI Soft

Thanks for the quick response. Adding another module on the page has also seemed to fix this issue, however I will edit code as advised.

Hello,

Firstly, thanks for an awesome module.

I have been using ARI Easy Slider 1.3.9 embedded in an article for a while without a problem. I've implemented `mod_arieasyslider` as a module and unless I have 2 `mod_arieasyslider` modules on one page the articles do not auto-rotate and nothing changes when one of the controls is clicked.

I tried to find the code you refer to above - `InputsExclusion.push('.content_vote','#rt-popup')` - in the JS files, but to no avail.

Please advise if there's a way to fix this.

Thanks

Hello,

Send your order number by email please and a link to a page where we can see the problem.

Regards,
ARI Soft
