

Image left, title right.
Posted by zvio777 - 2012/01/18 14:51

Hi all
How can I achieve following goal?
To show image from article on one side and title and intro text other side.
Is it possible from module parameters? (template form), or I have to modify the code?

Now it shows title on top of the intro text, image within intro text.

Re:Image left, title right.

Hello,

Do you want to extract the first image from an article and show it in one position and title with intro text without extracted image in another position? If yes, currently the module doesn't support this ability. It can be done if change article HTML code in appropriate way. You can submit feature request here.

Hi
This is is how it is now
<http://georgianroots.com/images/stories/first.jpg>

This is what I want
<http://georgianroots.com/images/stories/second.jpg>

Re:Image left, title right.

It requires modification of the module.

Is it possible to pay for someone to modify?
If so, how much it would cost?
