
Slide Kategorieblog

Posted by CarstenBartsch - 2012/01/18 17:10

Blog Category slider,

Hello. I have article in multiple categories in the "news" area. Now I would like to two columns layout. How is this possible?

Hello,

It is possible to specify how many articles should be shown at time in a slider with help "Items per page" parameter. If you want to show 2 articles, set this parameter to 2.

Regards,
ARI Soft

Hello,

thank you.

I know. The question is. How can i connect the categoryblog modul with easy slider? I have more than two articles but the have to show two articles in two cols. At the Moment the Easy Slider show nothing.

The module shows Joomla! articles by selected parameters (content category, section and others), it doesn't provide ability to use articles from a 3rd party extension (we suppose category blog is an extension).
