Text problem in ie
Posted by remiontop - 2012/01/30 15:59
_____

Hello
(i'm french)

I got a weird problem only ion ie (until 8).
I use ari slider for text content, i use futura font. My slides change by a fade. On the first one, the text is perfect and when i clic on one dot to see an other slide, content become very ugly, nearly unreadable (?)... But the first one is always ok, even when it's in random mode...

Any ideas ?

Thanks

Hello,

Where we can see described problem?

Regards,
ARI Soft

it's ok i did a different way but look at http://agence-jiminy.com/jiminyjoomla/index.php/realisations/web (i'll delete the page tomorrow)

with ie8, on the others it works like a charm

_____

Download and upgrade the module. After this clean browser's cache. It should help.
