
problem with jQuery on Windows XP

Posted by mediaschool - 2012/03/27 17:41

Hi,

I have a strange problem.

The same version of Firefox 11.0
gives different results:
on Windows 7 ARI Easy Slider works fine but
on Windows XP doesn't work (problem with jQuery)
I don't know how to solve it.

Look at:
<http://www.zakrzewskibasses.com/en/philosophy.html>

Regards,

Paul.

Hello,

We have checked the slider on Windows XP in the latest version of FireFor on your site and it works fine. We suppose this can be a problem on specific computer.

Regards,
ARI Soft

Hi,

good suggestion, I have found the problem:
Avira Web protection is blocking jQuery source
at <http://ajax.googleapis.com/ajax/libs/jquery/1.3.2/jquery.min.js>

so my question is how to put jQuery library locally to prevent
the same problem for other visitors with Avira Web protected
computers,

Regards,

Paul.
