4th slide on will not show images [SOLVED]

Posted by bonzlee - 2012/04/10 22:43

_____

I need help figuring this out. I set up Easyslide no problem. The first 3 slides are showing text/images without a problem. From slide #3 on, the images won't show up. Here is the page:
http://gator1758.hostgator.com/~mmi/index.php?option=com_content&view=article&id=156&Itemid=236

I turned off the articles slides 1, 2 and 3, and slides 4, 5 and 6 then showed images, so I believe the articles are set up properly.

I published the Easyslide module in a module position and in an article, and both have the same problem.

I'm thinking it's some sort of cache/memory issue? I have the ARI Extensions plugin installed which is suppose to resolve Joomla cache issues.

I'm working in Joomla 1.7.3.

Thanks for any help possible. My client needs to do a presentation this evening so I need to get it fixed ASAP.

Thanks!
Bonnie

_____

Hello,

What browser do you use? We have checked it in FireFox and Google Chrome and images are shown fine in the slider.

Regards,
ARI Soft

_____

I have tried Firefox, Safari and Chrome, all on the Mac. All 3 have the same problem.

I checked it on the PC and it is fine.

So this is a Mac-based bug.

Any ideas of how to fix it?

Thanks,
Bonnie

_____

Try to disable SmartLoad feature in site template settings.

Regards,
ARI Soft
