## text cut off and slides seemingly out of sync

Posted by heatherg - 2012/04/26 21:11

---

On most of the slides the last letter of each line is being cut off. As you cycle between the slides, one lone letter (the letter that was cut off I think) seems to show up. If you hit "next" a few times and then "previous" you can see this more clearly.

For the 3rd slide, nothing shows up. Click "next" for the 4th slide and the 3rd slide comes up as the transition.

Very Strange! I've tried uninstalling and re-installing, but it didn't help.

Thanks in advance for any advice!

Never mind, it was a CSS issue.
