## How to use News Slider in multi-lingual site

Posted by heatherg - 2012/06/21 19:40

---

Hi there,

I'm in the process of translating a site into French and am having trouble displaying my translated french content (as in nothing displays on the French side, although it displays perfectly on the English side). I'm using Falang to translate the site and I am on Joomla 2.5.6

As a work around, I've tried creating a new category with french articles, but Falang won't seem to allow me to save a different category.

Here's the site

Any ideas?

Thanks in advance,  
Heather

Hello,

Could you provide a temporary access to your J! backend by email so we can investigate the problem?

Regards,  
ARI Soft
