change the title lay-out (font size etc)
Posted by Bartalbert - 2012/08/27 09:49
_____

Hello,

just configured a easy slider for my website. I want to change the font color and size of the linkable title. Where and how do I exactly do this?

_____

Hello,

Could you provide a link to a page where we can see links which you want to change?

Regards,
ARI Soft

_____

I positioned the easy slider temporarily on this page: http://www.leidenamateurvoetbal.nl/contactpagina-amateurvoetballeiden/colofon

I just want to adjust the font size, color etc espacialy of the linkable title.

_____

Add the next code to "CSS Styles" parameter in module settings:

.es-container .es-news-item A.contentpagetitle
{
 font-size: 20px;
 color: red;
}

_____

Great, That worked.

One question left: if I click the link a page opens up underneath the easy slider box. After clicking a link within the silder I want the link to open a new page in the same browser window.

How do I do this?

Thanks, especially for your quick responses. Great service!

_____

What value do you use for "Source type -> Articles -> Template" parameter?

Regards,
ARI Soft

Posted by admin - 2012/08/27 14:16

_____

Add target="_blank" attribute to tag with {$readmore_link}:

{$title}

_____

Hi,

after clicking the link it still shows the article underneath the easy slider.

Let me explain the end goal: Easy slider needs to show some articles of a particular category (that's done). It has to show a image on the left en text on the right (can do that to within the article).
The best thing would be that if I add a 'read more' in the article, it would show in the article display of the easy slider. The read more link should load a new page containing only the article.

Is this possible?

Greetings Bart

_____

Do you want to show articles without header, footer and other site template blocks?

Regards,
ARI Soft

_____

No of course it should show the article within the template like this one for example:
http://www.leidenamateurvoetbal.nl/nieuws-oegstgeest-voetbal/120-interviews-oegstgeest-voetbalvereniging/1872-nonhebel-tijd-om-weer-eens-wat-te-laten-zienq

_____

You can specify on what pages you want to show the module with help of parameters from "Menu Assignment" section on module settings page. This is common parameters section for all Joomla! modules.

_____

I know how to put easy slider on pages using the menu assigner. This was not the question.

Why does the read more link not show in the article presentation in seay slider and how does the read more link load a new clean page within a template like the link in a previous post.

_____

Have your added read more link to intro text of an article and it is not shown?

Regards,
ARI Soft

_____

Right, I did put an read more link into the article the same way as other times. But it does not show in the slider.

_____

Could you provide a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft
