## ARI image Slider covers submenu

Posted by bderuiter - 2012/10/12 16:04

---

There is a problem on my website

The submenu shows behind the ARI image slider.

Please take a view at <http://www.hetfeestwinkeltje.nl/index.php>

Thanks! i had it offline but its accessible now!

Hello,

This problem with site template styles. Add the following CSS rules to fix the problem:

```
body #topmenu_wrap
{
  overflow: visible;
  position: relative;
  z-index: 2;
}
```

```
body #content-menu_wrap_bg
{
  position: relative;
  z-index: 1;
}
```

Regards,  
ARI Soft

Hello, I have a similar problem, except that I am using ARI Ext Menu for my nav bar & drop-menus. I tried implementing z-indexes for the relevant wraps as well, but every time the slider transitions to the next slide, it covers the submenu. Any suggestions?

Here is the staging location:

<http://nlyte.square2-lab.com/>

Thanks,  
Frank

Hello,

Add the following CSS rule:

**BODY #ja-mainnavwrap**

---

```
{  
position: relative;  
}
```

Thanks! That did it!

Have a nice day (or evening)!  
Frank
