Errors in \"class.ArticleController.php\"? [SOLVED]

Posted by IkerCortazar - 2012/10/26 13:58

_____

Hello,

I am testing in my local site the "ARI Easy Slider" module and when I activate it, I get these errors:

Notice: Use of undefined constant J2_5 - assumed 'J2_5' in
C:\wamp\www\unrlocal\modules\mod_arieasyslider\includes\kernel\Articles\j16\class.ArticleController.php on line 101

Notice: Use of undefined constant J2_5 - assumed 'J2_5' in
C:\wamp\www\unrlocal\modules\mod_arieasyslider\includes\kernel\Articles\j16\class.ArticleController.php on line 197

Notice: Use of undefined constant J2_5 - assumed 'J2_5' in
C:\wamp\www\unrlocal\modules\mod_arieasyslider\includes\kernel\Articles\j16\class.ArticleController.php on line 197

Notice: Use of undefined constant J2_5 - assumed 'J2_5' in
C:\wamp\www\unrlocal\modules\mod_arieasyslider\includes\kernel\Articles\j16\class.ArticleController.php on line 197

I attach a capture of the errors. Any idea of what is happening?

Thanks in advance. http://www.ari-soft.com/images/fbfiles/images/ARI_Easy_Slider_errors01.jpg

_____

Hello,

Download and upgrade the module. It should help.

Regards,
ARI Soft

_____

Hello,

Thank you very much for answering so quickly.

I have downloaded "ARI Easy Slider v. 1.6.0" from my Member Area, is there any other latest version? I can not find any other link.

I downloaded yesterday and I have installed it today.

Regards.

_____

Download the extension from "Member Area" again. We updated the module after your post.

Regards,
ARI Soft

_____

I have just downloaded, installed and tested the module and the problem is solved. Now it works ok.

Thank you very much for your help!
