
ARI Easy Slider BUG with JoomFish!

Posted by davidlobo - 2013/06/12 12:15

Hi, I have purchased your product "ARI Easy Slider" for joomla and it has been working perfectly fine!

Now for the first time I am using it with another component, called "JoomFish", which allows me to make translations, and for some reason when I change the language on my website the page keeps loading and loading as it doesn't go any further..

I think it may be generating some kind of loop, can you help me with this??

Thanks in advance!
Best Regards, Bruno.

Hello,

Could you provide a link to a page where we can see the problem and a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft
