
Fatal error using JEasySlider

Posted by Idnunes - 2010/07/13 14:03

Hello! I tried to use JEasySlider and got the following error:

Fatal error: Class 'AriUtils' not found in

/var/www/joomla/plugins/content/arismartcontent/content/ari_jeasy_slider4c3c6dba9f387/arijeasyslider.php on line 161

It appears to be similar to this (<http://www.ari-soft.com>) error.

I'm using Joomla! 1.5.14 with ARI Smart Content 1.6.0 and Joomfish 2.0.4.

If you need more info, please let me know. Thanks!

I managed to get it working: I've updated the Smart Content component to the last version (1.7.5), and it worked perfectly.
