
Alt Tag in ariimageslider

Posted by dsalchow - 2015/06/23 18:46

Hello,

I followed the instructions but the alt Tag is not displaying :(

The images path is images/slider/

I edit the file by this way:

```
images/slider/Banner_body_5.jpg="Fettabsaugung"  
images/slider/Banner_body_4.jpg="Brustvergrößerung"  
images/slider/Banner_body_6.jpg="Schamlippenkorrektur"
```

But the alt Tag is not displaying

only the Default description and Default link which I added in the backend. What I am doing wrong?

Thank you very much.

Best regards,

Dirk

Hello,

INI file should be located in folder with images and contains only file name (not folder or sub-folder). In your case place the INI file to /images/slider folder with the following content:

```
Banner_body_5.jpg="Fettabsaugung"  
Banner_body_4.jpg="Brustvergrößerung"  
Banner_body_6.jpg="Schamlippenkorrektur"
```

Regards,
ARI Soft

Thank you very much :) I was not aware that I have to add the file to the images folder.

Thank you very much
