
ARI Easy Slider 1.7.7 - Responsive

Posted by achim_joomla - 2015/07/24 15:32

Hey, great tool.

The responsive mode doesn't work.

View on mobile device isn't correct.

Width is ok

Height isn't ok http://www.ari-soft.com/images/fbfiles/images/display_on_mobile_device.jpg

Hello,

"ARI Easy Slider" is a content slider, not an image slider (it can slider any HTML content, not only images) and it changes only width in responsive mode. We can add a new parameter which will add ability to recalculate height in responsive mode and keeping aspect ratio between original "Width" and "Height" which are defined in module settings. Is it suitable for your needs?

Regards,
ARI Soft

Hello,

yes, this function will be perfect.

Have a nice day!

Thanks!!!

Download and upgrade the module to v. 1.7.8. It contains "Keep aspect ratio" parameter. Set it to "Yes".

PS: Clean browser's cache after upgrade.

Regards,
ARI Soft

Thanks.

It works perfect.

Greetings from styria (austria)
