
Slides do not move

Posted by mcpres - 2016/12/01 17:51

Hello. I'm implementing this on a Joomla 3.6 site and just purchased the module this week. Regardless of what I try, it will not slide to the next content item. I have script compression disabled so I know that's not the issue. Can you please help?

Hello,

Could you provide a link to a page where the problem occurs? If it is private, you can send it by email.

Regards,
ARI Soft

I determined the issue happens only within the tabbed area that I'm trying to use it. I emailed more info, links and access to you. Thanks!

This problem with styles of "jatabs" plugin. Edit /plugins/system/jatabs/jatabs/ja.tabs.css CSS file and replace the following code:

```
.ja-tabswrap .container ul {  
margin: 0 !important;  
padding: 0 !important;  
}
```

with the following one:

```
.ja-tabswrap .container ul {  
margin: 0;  
padding: 0 !important;  
}
```

Regards,
ARI Soft
