## Is there Documentation?

Posted by INIC - 2019/05/07 23:07

---

I can't find docs for just ARI Easy Slider" Docs here link to some other program and the one in the back-end just reloads the page, nothing else. I've always for Ari-soft docs pretty good, but I cannot find these.

WHY:?

I have a page with a table and two columns (cells). The column on the left is a image. The column on the right, is a where I want Ari-Easy Slider to load articles that will wrap according to responsive size of end users device.

I'll buy something else here if it is better suitable to my needs - but I think my plan is simple.

OK. I guess there isn't any help for easy slider either. What happened at Ari! Use to be great. Bye.

You can read how to use the module in "Description" tab on module settings page.

Regards,  
ARI Soft

I guess I wasn't clear enough when I said "...and the one in the back-end just reloads the page, nothing else." The "description" still shows nothing, other than reload the screen, and no extra description.

It's OK, I moved on.
