
ariimageslider.ini ALT

Posted by fiorenzi - 2021/01/13 13:48

Hi,

Hi ave last version of ariimageslider, 2.2.5 on joomla 3.9.22 I would like to set ALT on images used by arimageslider so I hav put ariimageslider.ini in images directory

the ariimageslider.ini looks like this:

```
accesso_abusivo.jpg="AAAA"  
cybercrime.jpg="BBBBB"
```

the url is for accesso_abusivo.jpg is https://www.studiofiorenzi.it/images/SlideShow/accesso_abusivo.jpg but there is no alternate the same

the same if I analyze www.studiofiorenzi.it in chrome i get only "alt title" no ALT specified from ini file also from online seo tester they said me that i have no ALT

can someone help me in understand what I am missing?

Thanks

=====
