
ari easy slider

Posted by mauvire - 2011/08/08 17:31

just buy easy slider, everything all right, but in the article a paragraph tag appears... impossible to get it away...
sorry for the bad language (i'm doing the best i can :-))
thanks, virginie http://www.ari-soft.com/images/fbfiles/images/Capture_ari_easy_slider.JPG

Hallo, i'm back... tried for different solutions... Using jce editor, put it away and even without editor and only the html code the problem is still the same. I've installed it on joomla 1.6.6...
Thanks for any solutions to solve this little problem...
Virginie

Hello,

Could you provide link to page where we can see the problem and temporary access to your Joomla! backend by email that we can investigate it?

Regards,
ARI Soft

Hy, I work with a usb webserver, before put it online, localhost. I found like a solution... in the editor (jce) put it on /br instead of /p... It helps a little. The tag is gone, but you still can see this : " (see the capture (frontend and backend))
Thanks, Virginie
