Remove previous and next buttons from navigation

Posted by Mark Searles - 2011/08/16 14:32

_____

I'd like to be able to remove the previous and next buttons in the navigation and only display the slide number buttons. For my site I only have a few slides and I want the navigation to be as simple and unobtrusive as possible.

Thanks

_____

Hello,

Download and upgrade "ARI Easy Slider" module. New version contains "Show next button" and "Show prev button" parameters.

Regards,
ARI Soft
