# Intro image in easy slider
Posted by francoleone - 2012/04/19 12:36
_____

Hello,
i've buyed Ari easy slider, it's very cool, but i've a seriuos problem: ari easy slider don't show intro image of an article in blog layout.
To see the related image i must instert the image directly into the article text using the "image button", under the text JCE text editor

How i can sho the intro image in ARi easy slider?

Thank you very much
regards

Hello,

Thank you for your suggestion. We will add a new predefined variable for intro image in the next version of the module. We will release it within a week.

Regards,
ARI Soft

_____

Download and upgrade the module. New version supports {$image_intro}, {$image_fulltext} predefined variables. It can be used in "Articles -> Template" parameter.

Regards,
ARI Soft
