
Paging is not working for ARI Table Sorter and

Posted by jtwhig - 2011/01/19 01:40

Paging is not working for ARI table sorter and everything is pretty much a mess. The themes do not load for ARI Data Table and I am very dissatisfied with purchase. Not user field at all.

Paging not working: missociety.org/index.php?option=com_content&view=article&id=58&Itemid=67

I would like to know if I could get the DataTable Pack for free to see if anything from there will work/help.

Thanks.

Hello,

This is a problem with extension which is used for optimizing javascript and CSS files loading (probably it is part of framework which is used by site template). It can't combine javascript files correctly, if you disable this feature you can see that the module works fine. We have updated the module that fix this problem with 3rd party functionality. Download and upgrade "ARI Data Tables" module please.

PS: After upgrade clean Joomla! cache on "Tools -> Clean Cache -> Site" page on Joomla! backend.

Regards,
ARI Soft
