## Installation

I am getting the error when trying to install the module and plugin.

\* JFolder::create: Could not create directory  
\* Unable to write entry

I have unzipped and uploaded to the modules and plugin folder, but I am getting some errors in the admin. I attached a screenshot.

Can you please help me install this?

Thanks. :)

Hello,

Could you provide temporary access to your Joomla! backend by email that we can investigate this problem?
