## Oh HORRIBLE! Help, Please!

Posted by corkcork - 2011/04/30 00:13

---

After I used the CSV feature, the module created an article, category, and section for each table item!! This has created a horrible mess!! How do I turn off this option??

Hello,

The module doesn't create any article, category or something another. Could you specify in more details your problem and if it is possible to provide temporary access to your Joomla! backend by email that we can investigate problem?

Hi, I was wondering if you had found the problem as to why Data Tables created an article, catalog, and section for each cell entry on the CSV file.

Since I haven't heard back from you, I deleted all the articles, sections, and categories that your app created and reinstalled the app. So far, it hasn't created any new articles, sections, and categories.

Hello,

Sorry for delay. "ARI Data Tables" is open source and you can check code and see that it doesn't create any articles, section or categories. If it happens, it can be a problem with another extension.
