
tables working slow with jQuery UI themes

Posted by jny007 - 2011/05/02 23:09

Hello,

if i enable jQuery themes tables are loading REAALLLYYY slow...you can check table with only 3 records...
http://www.hribolazec.si/index.php?option=com_content&view=article&id=54&Itemid=37

if i disable jquery theme tables are running smoothly - so it is not amount of records...

warm regards,
Jan

Hello,

It seems this problem with other javascript code on the page which is called on DOM ready event. It is specific problem and we can't reproduce it on our test server that investigate it. Could you provide temporary access to your Joomla! backend by email that we can investigate it?

Regards,
ARI Soft
