## Search Feature

Posted by garyjoomla - 2011/05/04 01:09

---

I need to expand the Search feature. Where is the filter located?

Hello,

If you mean "ARI Data Tables" widget, it uses  
\\modules\\mod\_aridatatables\\includes\\js\\widgets\\datatable\\js\\jquery.dataTables.min.js file.

Regards,  
ARI Soft

Hello,

Yes that is it. However, after reviewing the script, it is far beyond my scope to modify for my needs.

I would like to know if you can make the modifications for me. I understand there could be a charge for the service provided. What I need is the "fnFilterGlobal" added. I need to be able to search by multiple fields. Can this be done?

thanks

"ARI Data Table" widget search by all fields. Currently we can't provide custom development for custom filter. Sorry.
