
[SOLVED] need help with sorting

Posted by hgi - 2011/05/06 10:09

Hello,

I bought the ARI Data Table Module yesterday and - so far - everything works like a charm.

Now I have a question concerning sorting:

I have 3 columns: Trip - Summer - Winter

First column is the name of the trip, second and third column is marked with an "X" if available.

Is it possible to sort the table by "Summer" or "Winter" so that all entries with an "X" are on top of the table?

I'm using J1.5.23. Unfortunately the site is not online/available yet and I cannot provide a link.

Thank you

Hello,

Specify please what data source you use, CSV or database? If you use CSV, could you provide sample CSV file or if you use database could you provide sample table dump by email?

Regards,
ARI Soft

oh wow, that's what I call a quick reply :woohoo:

kinda stupid I forgot to mention:

I'm using the attached CSV

If you use "ARI Data Table" widget, you can set "Choose table type -> ARI Data Table -> Columns settings" parameter like on screenshot:
