
Links \"Add\" and \"Remove all\" don't work

Posted by sergiy - 2011/05/13 13:49

Good day,

I have obtained Ari Data Table and I must say that this is really great module. The only one problem in my case - it is impossible to configure "Columns settings", "Custom paging" and "Filters".
The links "Add" and "Remove all" don't work, so I can not save the data when I type something in the boxes. These two links gave the following bookmark-kind of URL:

http://www.mydomain.com/administrator/index.php?option=com_modules&client=0&task=edit&cid=10067#

So after clicking, the page just scrolls to the top and that's it.

Any help will be much appreciated.

Thank you.

Hello,

Is it possible to provide temporary access to your Joomla! backend by email that we can investigate the problem? It seems this is a javascript conflict with 3rd party extension.

Regards,
ARI Soft

Hi,

The email has been sent

Try now please.

We have set "Enable plugin for backend" parameter in "System - SC jQuery" plugin settings to "No".

Regards,
ARI Soft

What a simple solution.
Thank you very much, now everything works fine!
