How to I get the data to vertically align...
Posted by creotom - 2011/05/19 17:35
_____

...to center?

I'm sure this is easy to do but I'm afraid i'm a little confused by css and where to put the rule if I do find it.
I'm using the HTML table type.

Thanks in advance.

_____

Hello,

For example set "HTML table settings -> Table CSS class" parameter to my_table and add the next CSS rule to "CSS
Styles" parameter:

TABLE.my_table TBODY TR
{
 vertical-align: middle;
}

Hello, thanks for your reply.

I've tried this and it seems to have no effect. I cant see what I'm doing wrong.

Hi,

I've mailed a link to info@ari-soft.com

Thanks.

_____

Sorry, use the next CSS rule:

```
TABLE.my_table TBODY TR TD
{
 vertical-align: middle;
}
```

_____

Got it!
Thanks ever so much!
