
Themes and sortable table

Posted by starcastle - 2011/05/20 19:28

I just made my first test file work on a test page.
I love the sortable table with multiple sorting.

But I have not been able to apply any themes on it.
It looks like this whatever I do.

http://www.silken.windhound.com/index.php?option=com_content&view=article&id=95:testing&catid=37:klubben&Itemid=91

I can live with it, but it would have been fun to use other themes.
Especially the UI Darkness theme.
And no, I am worthless with CSS and would not have a clue on how to try something of my own...

jQuery UI themes can be used with "ARI Data Table" widget. For this select "ARI Data Table" in "Choose table type" drop-down and set "Choose table type -> ARI Data Table -> Using jQuery UI themes" parameter to "Yes".

Ah, and it still seems to do multiple sorting!
Thanks!

I thought you had to choose the table sorter for that.

"ARI Data Table" supports multiple-sorting. Press "Shift" button and click on head of sortable columns.
