how to adjust font size to make the colums fit

Posted by formad - 2011/06/10 21:43

_____

how to adjust font size to make the colums fit

theme: aristo
table type: Ari Data Table

http://www.jivana.eu/netwavesystems/index.php/company/world-wide-service-network-a-to-g-demo

kind regards
matthijs

_____

Hello,

You can use scrolling table. For this set "Choose table type -> ARI Data Table -> Scroll Width" parameter to 980

_____

If I put 980 in the scroll width, it pushes the edge of the data table outside the normal data area.

So, are you using a magic incantation to set the scrolling width to 980?

Also where is the documentation as to the values of the control layout field - defaults to "lfrtip"?

_____

What we can see a problem with scroll?

You can read about "Controls layout" here.
