
Ari-Data Visualizer x and y-axis show no data

Posted by escho70 - 2011/06/19 10:31

Hello,

iÒ'll try to explain my problem with my broken english ;)

in Ari Data Tables Visualizer the 2 axis (x and y) have no description (e.g. food, auto, household ...). If I use another Template it is shown, but I have to use the template. This is for FireFox

Another thing is, that in IE neither den x und y axis description is shown nor the table-content-line. To see what i mean, visit my TestSite.

I hope you can help me.

Bye
Olaf

Again hello,
i tried ARI GChart an it is shown now, i donÒ't understand why, but itÒ's workin with GChart but not with the Visualizer.

Hello,

Is the problem resolved or it requires any assistance from our side?

Regards,
ARI Soft

Hello,

if itÒ's possible to solve the Problem with the ARI-Data Visualizer it would be very nice. I Just change the output in my site to the Visualizer, where the x and y Axis shows no Data an in IE8 it also shows no row line.

Download and upgrade "ARI Data Tables" module please. It should resolve the problem in IE browser.

Regards,
ARI Soft

Hello,

ok, i Updated ARI Datatables an the IE Problem is solved.
But still the x and y Axis shows no Data when i?m Using the ARI Data Visualizer.

This conflict with site template styles. Add the next CSS rules to site template CSS file that fix the problem:

```
.art-post .arijdatavisualizer
{
margin: 20px
}

.art-post .arijdatavisualizer .visualize LI
{
overflow: visible;
}
```

Hello,

thanks a lot, thats it. I knew it could be solved with an css Code, but i had no Idea where to look first.

All Problems solved.
