display rows for current login user only?
Posted by chanpeter88 - 2011/06/30 17:07
_____

i have a table (joomla_userid, data1, data2).

could i display only joomla_userid = current login userid?

pls advise.

_____

Hello,

You can use {$UserId} predefined variable in "WHERE" clause in SELECT query. It contains ID of logged user.

_____

Hello,

List of predefined variables can be found in "Description" field on module settings page.
