HELP! Will not install after unzipping package.

Posted by coreyaw2001 - 2011/07/10 09:30

_____

I just bought ARI Data Tables. I followed the instructions and unzipped the package first. However, I cannot upload the ARI Extensions System Plug-in.

I receive the following error: "Error! Could not find a Joomla! XML setup file in the package."

Please help!!! The module and content plug-in installed just fine. :(

_____

Hello,

"System - ARI Extensions" plugin is required only if you use Joomla! 1.6. This fact is described in readme.txt file from extension's archive.

Regards,
ARI Soft

_____

The documentation could be a little clearer. I opened the read me file, which said skip this. All I am left with is 3 extensions which a person would assume means all need to be installed.

However, I am happy with your timely response and guidance.

Thank you.
