
Parameters for the {aridatatables} order content

Posted by enricocerica - 2011/07/11 06:58

Hi,

Just wonder if they are some more parameters available in the {aridatatables moduleId="..."} order ?

I mean, is it possible to alter the presentation, for example it would be nice to be able to choose the jQuery UI Theme or any other setting and even to set the SQL query (mainly for test purposes).

Do you plan to allow such functionalities ?

Anyway is there an easy way to change the jQuery UI Theme value at runtime ?

Hello,

"Modules Anywhere" plugin can be used that load the module and override parameters inside plugin tags. Some information can be found here.

Regards,
ARI Soft

It just matches my expectations.
Thanks !
