
No x y axis data

Posted by marcelke - 2011/07/12 09:51

Hello,

I use the JA Ores template and the Data visualizer. However the x and y data is not shown. I use the latest version of Ari and tried the css modifications I found on the forum.

Help will be welcome.

Kind regards,
Marcel

Hello,

Could you provide link to page where we can see the problem?

Regards,
ARI Soft
