Linking articles in 1 or more categories

Posted by awh_chan - 2011/07/17 09:52

_____

Hi,

Is there any methods to put a link of articles within 1 or more categories, within a table column?

Thanks!

Anthony

_____

Hello,

Do you want to show link to page with all articles from specific category or mean something another?

Regards,
ARI Soft

_____

I would like to show the link of every individual article from a category, i.e. each article is displayed as in single cell/row of the table.

Thanks!

Anthony

_____

Link to specific article looks like:

index.php?option=com_content&view=article&id=ARTICLE_ID

Where ARTICLE_ID is ID of article. For example if you want to show articles from content category with ID equals to 3, set "Source type" to "SQL", enter the next SQL query:

```
SELECT
  id,
  title,
FROM
  #__content
WHERE
  catid = 3
```

and set "Columns settings -> Columns settings -> ID" parameter to title and "Columns settings -> Columns settings -> Format" to:

index.php?option=com_content&view=article&id={$columns:id}

_____

Thank you very much for your useful and prompt response.

However, I only get the plain text "index.php?option=com_content&view=article&id={$columns:id}" rather than the actual link of "index.php?option=com_content&view=article&id={$columns:id}", following your instruction.

Thank you again!

Anthony

The problem was solved by setting the parameter "format"
as
{$value}
rather than
index.php?option=com_content&view=article&id={$columns:id}

Thank you for your great support!
