
Shadowbox image popup link

Posted by xega - 2011/07/26 12:55

I don't know if this is something you can help me with, but I'm wondering if it is possible to create a hyperlink in a cell, that links to a popup image in a shadowbox?

Hello,

Could you specify what shadowbox extension do you use (module, plugin)?

I was gonna try Modalizer, seems to be almost the only thing that is compatible with 1.7.

It seems Modalizer can be executed through HTML code. If you load table into an article, you can use our free extension called "ARI Sexy Lightbox Lite". If you provide more information about structure your and what do you want to show in a lightbox, we will help to configure the extension.

Hi again. I've installed the plugin (although it says it's for Joomla 1.5 and 1.6. and not 1.7), enabled it, and tried the various examples mentioned on the demo page, but to no avail. I guess it's because I'm running on Joomla 1.7?

The plugin supports J! 1.7. Could you provide link to page where we can see the problem?

www.hafdal.dk

The link I entered into my article is:

*/ Show google site in popup

But it gets changed to:

*/ Show google site in popup

Could you temporary access to your J! backend by email that we can investigate the problem?

Try now please. The plugin didn't work because it was disabled.

That's strange, I double-checked that it was enabled??

But anyways, the plugin now works in my article, but not in my table. See <http://hafdal.dk/index.php/kirkegarde/svenstrup-kirkegard>

You have to select to show 50 entries so you can see the link. I copied the link just as it is on your webpage, just to see if I can get that to work at least.

Did you have time yet to look at the table entry?

Hi...I found a new issue :-/ Once I have more than 10 entries in my table and I have to press the arrow to view the next 10 results, the shadowbox no longer works.
