
Table Widgets Display Incorrectly

Posted by sstockst - 2011/08/10 18:54

My site uses a RocketTheme template and there are CSS problems with most of the datatable widgets. After spending several hours trying to make it work I have exacerbated my patience.

Are there known issues with the RocketTheme Gantry framework?

<http://lpmss.com/index.php/productmenu>

Please help :-)
