## problems with datatable

Posted by wOrker - 2011/08/15 01:31

---

Hello

1. Help to deal with sorting data in a table has a column "price" in the module settings in the mode of sorting is "Numeric", but if suddenly there is text, it immediately breaks down and sorting is not working properly, the fact that some lines are numerical data so I write it, "No Data", because of this sort function ceases to operate normally. Advise me how to solve this problem.

2. The last time I asked you to draw a conclusion in a data table of items, everything works well (see link above), I made a similar another table, but why an article does not appear in it if the database is only one article that the data do not come to the table, if the two articles is displayed, only one, if three then two, and so on.

here is the link: <http://ozcreative.ru/catalog/ourcatalog/decoration>

in the table are two links to TEST4 TEST5 and although the base is still TEST0 (the very first article in this category)

3. Rather, the issue is the problem if I use the data code, such as color ( 999 ) will be a table correctly handle such data?

=====

Hello,

1. Where we can see the problem?

2. Could you provide temporary access to your Joomla! backend by email that we can check module settings and link to page where the problem occur?

3. Do you mean sorting of this field or something another? Should it be sorted as string or numeric?

Regards,  
ARI Soft

Here you can see: <http://ozcreative.ru/index.php/catalog/ourcatalog/restourants>

try to sort of fifth column "Price", then why sorting does not work entirely correctly, some items are not treated.

Settings can be seen in the picture.

Try now please. We have set "Sorting type" parameter to "Numeric HTML".

Strangely, I stood Numeric HTML I just before you tried to write himself to solve the problem by setting a setting in Numeric. I had to reload the page, apparently this is true story cache.  
Sorry it's probably just my carelessness.  
Thank module works perfectly, and once again I would like to thank you for this wonderful product and your prompt technical support.
