
Problems saving file path

Posted by sitemoves - 2011/08/27 11:57

Hi,

I have some problems with saving the path to mij CSV file.
The path is images/lijsten/literatuurlijst.csv
When I hit the save button, the path-field appears to be empty every time.
Other module setting are saved except for the file path.
Please could you help me with this problem?

Regards, Theo

Hello,

Check that "System - ARI Extensions" plugin is installed and enabled.

Regards,
ARI Soft

Yes it is and enabled, also the content plugin.
The problem is still there

Could you provide temporary access to your J! backend by email so we could investigate the issue? It can be a conflict with a 3rd party extension.

Regards,
ARI Soft

The problem occurs when "Advanced module manager" extension is used. We will investigate the problem in more details and report about results soon.

Regards,
ARI Soft

Re:Problems saving file path

That's what I thought yeh.

Now it seems that Peter (nonumber) is a very good programmer and I don't think he is using the tools the wrong way. I used the latest version of Advanced Module Manager.

It would be great if you can find a solution because Joomla without Nonumber extensions is bad ;-)

Thanks again.

This is a good review worthy ;-)

Re:Problems saving file path

Your module is great I must say!!!

I have one other little question.

Lets say I have a column with names. Most of the cells do have one name but some of them have 2 (or more) names.

I don't want them display like this:

name1 name2 name3
but
name1
name2
name3

Is this possible?

Regards, Theo
