Blank Page shows up after pressing install Posted by choyal - 2011/09/08 10:14

I tried both the "Upload Package File" and "Install from Directory" methods and both ways I get a blank page when installing "com_arismartcontent_data"

I'm using Joomla 1.7.0 and the memory_limit is 32M.

Let me know what I can do.

Re:Blank Page shows up after pressing install Posted by admin - 2011/09/08 10:17

Hello,

Currently the extension is not compatible with J! 1.7. New version will be released within a couple of days.

Regards, ARI Soft

Any updates?

Is it compatible with 1.7 yet?

Re:Blank Page shows up after pressing install Posted by admin - 2011/09/28 10:05

"ARI Smart Content" v. 1.8.0 is compatible with Joomla! 1.6 and 1.7.
