linking to filtered view

Posted by pbaumann - 2011/09/15 11:06

_____

Hi, I consider using ARI Data Tables and need to know if this possible:

I would like to link to filtered views of a table, as if the user has entered something into the filter field already. Is this possible and how would the link have to look? I'm sure I would have to pass some parameter in the link, but I'm not sure about the syntax. Appreciate any hints.

Best regards
Patrick

Hello,

Do you want to use request parameters in a SQL query?

_____

Hi, no, I just would like to link to the filtered view. Imagine I have a table like example 1 here: http://www.demo2.ari-soft.com/joomla-data-tables.html

When I enter something into the search field, the table gets filtered. And to this already filtered view I would like to set a link.

Sorry, but the extension doesn't support this ability.
