$REQUEST in Format link

_____

is it possible to use the {$REQUEST;} function in the format field for ARI Data table module similar to the use of {columns:column_id} and {$Value}

I am trying to pass a variable using a hyperlink and the variable is not in any column of the query

thanks

Re:$REQUEST in Format link

_____

Hello,

The extension supports using of request variables in SQL query only, but we can add this ability to the next release of the extension.

Re:$REQUEST in Format link

_____

is it possible to add the following use of $REQUEST as a variable in the query

SELECT leagueid,teamid,playerid,bid,bidtime FROM fs_hockey_auction_{$REQUEST:leagueid}

thanks

Re:$REQUEST in Format link

_____

No, request variables can be used only in "WHERE" clause.

Re:$REQUEST in Format link

_____

Where can I get more information on $REQUEST?

Thanks in advance.

==

Re:$REQUEST in Format link

_____

{$REQUEST:VARIABLE_NAME} (where VARIABLE_NAME is name of a request parameter) will be replaced with value of necessary request variable in SQL query.

Re:$REQUEST in Format link

_____

Hi again,

have you added this feature? I've downloaded the latest version but am unable to get the $REQUEST funtion to work in the format field for ARI data table module

Re:$REQUEST in Format link

_____

Hello,

Download the module and upgrade it again please. v. 1.5.35 supports ability to use request variables in "Format" field.
