Fatal error when uploading a CSV File

Posted by cyfroice - 2011/10/04 23:56

_____

I am having a couple of issues. I first got a strange error when trying to install the third file that came in the package I downloaded. The file I was trying to install is named: plg_system_ariextensions.zip The other two installed just fine. I have attached a screen clip of the install error.

This may be resulting in the error I am receiving when I try to upload a CSV file into an article through the plugin or maybe not. Here is the error:

Fatal error: Call to undefined function finfo_open() in /home2/pereirac/public_html/components/com_csvtotable/views/execute/tmpl/_helper.php on line 248

I have attached the CSV file as well.

Thanks!

Hello,

"System - ARI Extensions" plugin is requires only for J! 1.6+, it doesn't require for J! 1.5. This fact is described in readme.txt file from extension's archive.

About the error, it is not a "ARI Data Tables" error. This error in "CSV 2 Table" component.

PS: "ARI Data Tables" doesn't provide ability to upload files. If you want to upload files to your server, you can use a file manager extension like eXtplorer.

Regards,
ARI Soft
