Apply CSS on a whole line
Posted by enricocerica - 2011/10/05 15:35

_____

Hi,

I can apply classes to a single column or to a alternate lines but is there a way to apply css classes to specific lines based for instance on a value in a column (usefull to highlight lines in the result). I tried to use the {$value} in the 'CSS Class' parameter but it is not resolved. I can use the Format column with for instance ... but it only affects one column and I would like to avoid to have to make that for all the colums.

Am I clear ?

Any idea ?

Thanks

Hello,

Sorry, but the extension doesn't support described ability.

Regards,
ARI Soft
