
Couple of problems with csv data

Posted by bjamieson - 2011/10/07 01:13

Hi,

I'm testing the latest version of csv data tables with a local copy of joomla 1.7.1, it has the Camber Rocket Theme applied to it.

I've embedded the data table into an article with the following code:

```
{arijdatatable bPaginate="true"}
  {aricsvtable file="results/Full_Results2.csv"}
  {/aricsvtable}
{/arijdatatable}
```

Firstly, the ARI JQuery UI Loader only has one option for the Default jQuery UI version - 1.5.2, but for whatever reason, only the themes for 1.7.2 take effect - I can choose between smoothness, lightness and darkness. I don't understand why that is.

Secondly, the theme is only applied to the table if the first row ONLY is displayed, if the table tries to display both rows, the theme fails, and sorting and searching are lost.

In other words, I need to do {aricsvtable file="results/Full_Results2.csv" limit=1}

The data file is supplied if anyone can help me figure why the second line causes the process to fail.

Thanks,

Brian http://www.ari-soft.com/images/fbfiles/files/Full_Results2.zip

Hello,

Provide a link to a page where we can see the problem please.

Regards,
ARI Soft

Hi,

You can see it here:

<http://www.tighgadhar.net/>

The front page has duplicated exactly the data problem I'm seeing locally with 1.7.1

Additional info:

I added the following php settings:

```
pcre.backtrack_limit=-1
memory_limit=64M
max_execution_time=300
```

Also, I was seeing a bunch of issues where the char " was occasionally replaced by " which really messed up parameter settings - I turned off the text filtering for superadmins...

Hello,

Could you provide temporary access to your J! backend by email so we could investigate the issue?

Regards,
ARI Soft
